

Free infection prevention & control training and resources to support your Science and PSHE curriculum **book now**

We're offering free e-Bug training for primary school teachers. The e-Bug programme is designed to improve hand and respiratory hygiene, and reduce antibiotic use.

The pupil survey shows that children don't wash their hands enough. E-Bug will help them understand how important hygiene is for health, as well as raising the profile of the issue in school and at home.

Here's what you'll receive

-  A 2.5 hour training session about microbes, hygiene and health
-  Lesson plans and pupil worksheets
-  Fun activities and a starter pack of goodies!

What's in it for you?

-  Increase your all round knowledge of hygiene practice
-  Being an e-Bug approved educator counts towards your healthy schools status
-  The e-Bug modules cover science curriculum topics in a fun and interactive way
-  Protect staff and students from illness and reduce absences

Book now for training dates in October:

- 8 October** 9am to 11.30am at 2&6 Therapy Rooms, Gloucester
- 9 October** 9am to 11.30am at The Pavilion, Cheltenham
- 9 October** 1pm to 4.30pm at The Pavilion, Cheltenham
- 17 October** 9.30am to 11.30am at Gloucestershire College, Cinderford campus

Email infectionprevention.schools@gloucestershire.gov.uk for more information or to book your place.

Here's what teachers said about e-Bug last year...

Great resources and the children were very engaged and learnt a lot.

The snot gun activity is really powerful as it's quite impressive to watch, making it memorable.

Since the assembly and a focus on the importance of handwashing, we have seen a reduction in the number of children absent from school with tummy bugs.

The 6 steps seemed to be both easy to cover and extremely relevant.

The children are also much more keen to wash their hands before they eat!

The top trumps was very easy as children have all got experience of this style game, and it therefore leads into discussion about bacteria etc.
