About Wise

StayWise brings together the collective educational resources of the emergency services and key safety focussed charities. This will support teachers and community safety practitioners in delivering essential safety messages.

StayWise facilitates an effective, consistent and curriculum linked way of imparting vital life skills to today's young people and prepares a safety conscious environment for the generations of tomorrow.

By using the tools on the site, we can strengthen relationships between communities and emergency services, enhancing the health and safety of everyone within our communities. StayWise is the output of what can be achieved by combining the shared ambition and determination of the emergency services and safety focussed organisations in the pursuit of reducing avoidable injuries and deaths within our communities.

Led by the National Fire Chiefs Council, this programme seeks to join up safety education activity across the UK.

Safety education in one place

 offers a range of resources and activities for everyone

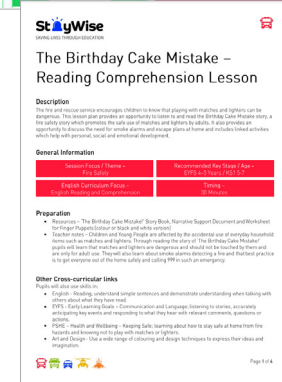

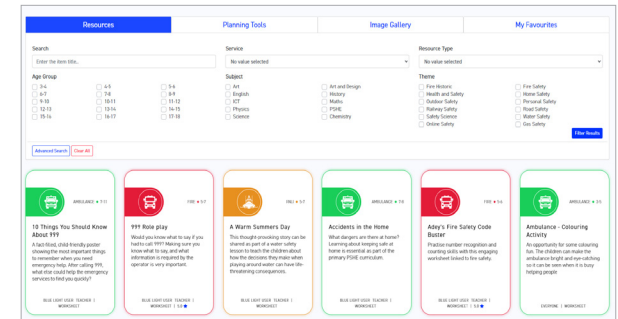

Teachers

Mapped to the curriculum, our resources can be linked to a range of subjects and focus areas to truly embed safety messaging into everyday learning.

At staywise.co.uk you will find lesson plans, activities and supporting documents from Early Years all the way to KS4.

Blue Light Users

The resources in the blue light area are designed specifically for delivery by trained community safety practitioners. They encompass a range of subject matters that keep the community safe. Schools and other professionals can request support from their local services on these subjects.

Everyone

The resources in the public area of the site are designed to be used by everyone. These interactive activities are a fun starting point for family discussions about safety or as an engaging way for children and young people to learn lifesaving safety information.
